 THE UNIVERSITY OF BRITISH COLUMBIA
Faculty of Education
Teacher Education Office
MIDDLE YEARS OPTION
EDUC 419 FINAL REPORT

Student: Christian Loro **District:** Coquitlam (SD #43)
Faculty Advisor: Lawrence Holbrook **School:** Moody Middle School
School Advisors: Kate Zubick **Grade:** 8

23 June 2011

Christian has successfully completed his 12-week practicum as part of the Middle Years Cohort in UBC's Teacher Education Program. He taught grade 8 students in Language Arts, Social Studies, Health and Career Education, and Art as a member of the Purple Pod teaching staff at Moody Middle School in School District #43 (Coquitlam).

Professional Qualities
Christian has an easy-going and approachable presence in the classroom. As an important part of the Purple Pod, he attended team and staff meetings; developed collegial relationships with fellow staff members, particularly the Teacher-Librarian and his fellow Grade 8 Social Studies teachers; and assisted with team events. Specifically, Christian supervised students during Grade 8 Camp. He also supported school-wide activities as a coach for the rugby team and as a group facilitator helping to implement the Dare To Care anti-bullying program. In the classroom, Christian was open to suggestions on how content and processes might be improved and he was successful in implementing some of my recommended changes in future lessons.

Planning
His unit plans were organized around IRP learning outcomes and Christian was able to use a variety of materials and methods in an effort to meet each unit's goals. To that end, Christian used several resources – including PowerPoint slide shows, Prezi presentations, songs, video clips, performance poetry, and cartoons – and various strategies – including demonstrations, Gallery Walks, simulations, and self-directed inquiry - to engage students in their learning. The grade-wide Renaissance Inquiry Project that Christian instigated, co-organized, and implemented in his classroom deserves particular mention. Inspired by an inquiry task he experienced during his coursework at UBC, Christian collaborated with his Social Studies colleagues to design a self-directed student research project involving three steps: the posing of a rich and thoughtful European Renaissance-

For the 3-year vaccine a pet should not be vaccinated less than 1 Barbados: Barbados divides countries into one of the two categories based on the risk of anger. Category 1: countries and territories free from rage or those with low risk compared to anger. Category 1 countries - Category 1: Isorre Andorra, Anguilla, Antigua & Barbuda, Aruba, Ascension Island, Islands (Bonaire, St. Eustatius & Saba), British Virgin Islands, Canada, Cayman Islands, Channel Islands, Curacao, Falkland Islands, Faroe Islands, Fiji, French PolynesiaNevis, St. Lucia, St. Maarten/St. Martin, St. Pierre & Miquelon, St. Vincent e il il San Marino, bago, Turks & Caicos Islands, United Arab Emirates, United Kingdom, United States of America, American Virgin Islands, Vanuatu, Vatican City, Wallis and Futuna Categories 2: All other countries and territories. Even animals travelling by sea (e.g. on yachts, cruise ships and cargo ships) fall into this microchip before or at the time of vaccination against anger. Inactivated virus vaccines should only be used manufactured in accordance with the recommendations of the OIE terrestrial animal manual. The validity of the vaccine is according to the manufacturer's recommendations. The vaccination must be at least three (3) months. In the case of a booster vaccination, the booster must have been administered by the expiry date of the previous vaccine. of a vaccination against anger expired or missed before your dog or cat is eligible to enter Barbados. If the vaccine manufacturer's technical card the main course of vaccinations, the 35-day wait applies from the date of the final vaccination of that course. The day of vaccination counts as day 0. Test of antibodies of anger: animals that have been found in a category 2 country in the 3 months prior to the trip from the United States to Barbados and of anger using a FAVN Test performed in an approved laboratory. The test must be performed at least 30 days after vaccination of anger with results Ä Y 0.5 UI/mL. In the case of a result of the failed test (less than 0.5 UI/mL), the animal must be recoated and retested before the trip is allowed. View a hcinnatirb inigreV elosI Conditions of Jost van Dyke for the import of dogs and cats from non-skenic countries (endemic of anger): that dogs / cats have / had at least two inactive vaccines of anger; The first not before 3 months of age and another at least six months later. Those months after the first second or later vaccines to anger booster, the serological test (FAVN) was carried out to determine the presence of adequate neutralizing antibodies of viruses before departure. Animals will be allowed to enter the British Virgin Islands up to twelve months after the last round of boosters, subject to the main course of vaccinations, the 35-day wait applies from the date of the final vaccination of that course. The day of vaccination counts as day 0. Test of antibodies of anger: animals that have been found in a category 2 country in the 3 months prior to the trip from the United States to Barbados and of anger using a FAVN Test performed in an approved laboratory. The test must be performed at least 30 days after vaccination of anger with results Ä Y 0.5 UI/mL. In the case of a result of the failed test (less than 0.5 UI/mL), the animal must be recoated and retested before the trip is allowed. If there has been no time in vaccination of pet anger, the pet should not wait 21 days to travel to the EU after vaccination boosters. If the pet has a vaccine is a primary vaccine, the animal must wait 21 days after the date of that vaccine before its entry into the EU. If the pet has less than 15 weeks and has not been vaccinated for anger more than 21 days before entering the EU, see step 2 to determine whether the pet is eligible to enter the EU by Haiti: Vaccination/certificate of proof of anger issued no less than 21 days and no more than 11 months before arrival. Jamaica: The dog or cat must be vaccinated against anger virus with an approved inactive vaccine. Only vaccines produced in accordance with the recommendations of the World must be used. The dog must be vaccinated with an inactivated anti-correct vaccine that: LAST UPDATED: 30/11/2017 or was given when the dog had at least 90 days; or is valid, in accordance with the manufacturer's instructions, at the time of export. • The dog or cat has reached a virus of post- at least 0.5 IU/mL between three months and twelve months before importation; • A result of less than 0.5 IU/ml is not acceptable and in this circumstance the dog or cat must re-vaccinate and the repeated testing process. • Rabies neutralizing antibody The test must be a neutralization test of the one by a reference laboratory of the OIE/WHO anger (eg. Rabies Diagnostic ;eselgni ;eselgni ni eresse onoved oirotarobal id itroppar I fâ .)otinU ongeR ,egdirbyew ,ycnegA seirotarobaL yranireteV & htlaeH laminA ;ASU ,ytisrevinU etatS sasnaK to be completed on the test lab's headboard; and include: The date of blood was extracted and the date of arrival of blood sample the laboratory; i,§ The signature of the authorized person who issues the laboratory report; i,§ The country where the blood result of the test. äf f The dog or cat can only be allowed for entry into Jamaica not less than three (3) months and no more than twelve (12) months after the date of the blood sample that gave a neutralization of the fluorescent antibody virus (FAVN) The result of the test was extracted. RAGA: the for killed viruses or a recombinant vaccine that expressed glycoprotein of the anger virus; Primary vaccination: Anger vaccine was administered no less than six months and no more than a year before the date of shipment. A copy of the vaccine certificate is not given more than a year before the date of shipment. A copy of the latest vaccination certificate is required; And a neutralizing antibody titration test for anger was conducted at an official laboratory (World Animal Health Organization authorized laboratories for anger antibodies described in the OIE manual of diagnostic testing standards and discovered at least 0.5 UI/mL of antibody in its serum. Martinique: If the animal has less than 15 weeks and has not been vaccinated for anger more than 21 days before entering the EU, this Member State does not allow entry of the for anger more than 21 days beforeIn the EU: the vaccination of anger must take place on the same day as the microchip system. Anger vaccination can be administered the il Day as a plant microchip, but any vaccination of anger before a microchip is implanted is disabled. If the pet had a compatible or before the most recent vaccination of the domestic animal and is still legible, the animal should not be shore ISO to travel in the EU. Remember, the dates of number and planting of both microchips must be documented on the EU health certificate and at least one of these microchips must have a period of time in vaccination of the anger of the domestic animal, the pet must not wait days to travel to the EU after the Booster vaccination. If the pet has more than 15 weeks and the most recent anger vaccine is a primary anger vaccine, the animal must wait 21 days after the date of the one niaga detaeper eritit eht dna nevig tsum eniccaV retsoob that ,evitagen eritit tsrif eht f tluser eht selt somt somtom you ERTIT tsrif eht .1 tset .yrtnie-er rof deriuquer the retit 1 ylno ,raey and naht ssel yrtnuoc eht fo tuo neeb sah dna dna sttik .ts of neeb ylsuoip sah lamina eht :etonâ Úf. crupua ta ta ygoLohtap fo tnepranped eht ro ytisrevinu tats sassak to rotarobal seibaR eht morf lm/ .ts yb dilav deDereDesnoc ton era ega fo shtnom 3 naht ssel step tp tp tp nevig senicccav seibaR .Elbatpecca senicccav raey-3 DNA Raey 1 htob htob htob .snoanicv sebar slight slamin slamin Neeb Evah ot Deriuer Era Strab .ts qnitetne step :ymelâ@âne steps. htrab tnias .tnempahs eht ynapmocca tsum noitacifterrek noitacccav seibaR dilav a .Senicccav seibaR no tnerruc tsum ega FO shtnom)4(Ravof Revo stod gnitats ,etacifitrec htlaeh etatsretni laicffo na yb deinapmocca eb llahs ociR dedulci eb osla dluohs etacifitrec seibaR eht fo ypc A .tarrestnoM gniretne ot roirp yletaidemmi shtnom eerht tsael ta fo doirep a rof nigiro FO yrtnuoc eht ni devil tp top ruoy .yrtnie ot ts roirp shtnom 21 dna syad 03 neewteb sesaesi rof detanicccav Eb t tsum ruoyâ fi enimreted ot 2 naht erom seibaR rof detanicccav neeb ton sah dnaâ ä,dlo Skeew 51 naht spelâ sseline eht tep eht in Less than 30 days and not more than 12 months after the first year.
